

Assignment 1

Scenario 1:

a) Actions Alysa should take are:

- Refuse to cut corners on testing (Trait: Seriousness & Ethical Responsibility).
It is ethically correct because professionals must prioritize quality and reliability over deadlines.

- Stay calm and focused, avoid blame culture (Trait: Remaining focused & Professionalism).

This reflects professionalism and helps maintain a healthy work environment.

- Show leadership by proposing realistic solutions (Trait: Leadership & dealing with the unexpected)

Ethical because transparency builds trust and avoids future risks.

b) Dilemmas present are:

- Moral: Pressure to compromise quality vs doing the right job.
 - Ethical: Skipping testing violates professional standards.
 - Legal: Faulty software could lead to lawsuits, breach of contract or financial loss.
-

Scenario 2:

a) Actions Bilal should take are:

- Refuse to manipulate data (Trait: Integrity)

Ethical because truthfulness is essential in data analysis.

- Report concerns or seek guidance (Trait: Accountability)

Shows responsibility and protects stakeholders.

- Show courage and stand by ethical principles (Trait: Courage & Ethical Judgment)
Ethical because misleading data can cause major business harm.
-

b) Dilemmas are:

- Moral: Job security vs honesty.
 - Ethical: Data manipulation violates professional codes.
 - Legal: Could be considered fraud, leading to penalties or lawsuits.
-

Scenario 3:

Issues:

- Software piracy
- Violation of copyright laws
- Unethical cost-saving practices

Professional Obligations:

- Follow the law
- Maintain Integrity
- Protect company reputation

Response:

- Politely refuse to install cracked software
- Explain legal risks
- Suggest purchasing proper licenses or free alternatives

Consequences:

Job risks, legal penalties and reputation damage

Scenario 4:

a) You are being influenced by personal gift (benefit) instead of a fair decision. This creates conflict of interest.

b) A Gift becomes a bribe when:

- it is high in value
 - it is given to influence a decision
 - it creates a sense of obligation
-

c) Proper actions are:

- Return the laptop
 - Report to management
 - Continue evaluation on merit
 - Maintain transparency
-
